

NEW FOR 2015

AVANTI™ 'FL06-203' (U.S. PATENT PENDING)

Southern Highbush Blueberry Cultivar

- ◆ **Estimated Minimum Chill Requirement: 100 Hours**
- ◆ **50% Harvest: Around April 10 (Gainesville, FL)**
- ◆ **Growth Habit: Upright**
- ◆ **Fruit Size: Medium**

Avanti™ 'FL06-203' is a new variety which is noted for its very low chill requirement, very early fruit maturation (as early as late-January in south-central Florida), and adaptation to production regions in central and south-central Florida. Plants are particularly well suited to an evergreen system in the southernmost production regions in Florida, with yields far exceeding the current evergreen varietal alternatives. Plants produce firm, high quality fruit with a small, dry picking scar. Fruit of 'FL06-203' is only medium-sized and may become smaller as the season progresses.

- ◆ Average Berry Weight (g)² 2.3
- ◆ Fruit firmness (g/mm)² 211
- ◆ Soluble solids (%)² 13.3
- ◆ Titratable acidity (%)² 0.37
- ◆ SS/TA Ratio² 50.0

² Fruit Quality - 2012-2014
